

# MOUNTING BRACKET

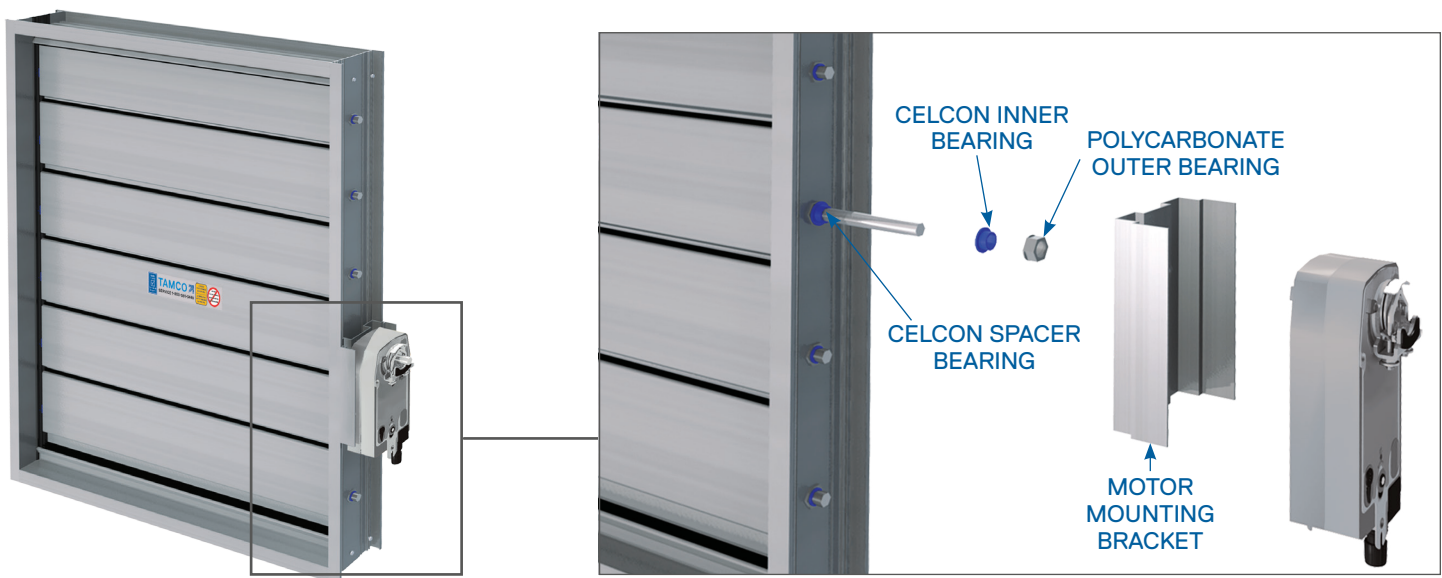

FOR ELECTRIC ACTUATORS

engineering data  
and specifications

SERIES 1000, 1000 SM, 1500, 9000, 9000 BF, 1000 FB, 1500 FB, 9000 FB

## FOR ELECTRIC ACTUATORS DIRECT-COUPLED TO DAMPER DRIVE ROD

- TAMCO Motor Mounting Brackets (*Part # AL-0001*) are purpose-built to snap snugly into TAMCO damper frame extrusions.
- Belimo actuator fits securely inside the mounting bracket, thereby ensuring that there is no rotation of the actuator housing.
- TAMCO Motor Mounting Brackets simplify actuator installation.
- No fastening screws are required.
- Motor mounting bracket fits directly over damper drive rod.
- Comes with a Celcon spacer bearing, in addition to a Celcon inner bearing and a polycarbonate outer bearing to eliminate action between metal-to-metal riding surfaces.
- Not to be used with In Duct or Extended Rear Flange install types.

### NOTE:

Refer to TAMCO Aluminum Damper Installation Guidelines (Motor Mounting Methods), for more information regarding electric actuator installation.
